

CITY OF BELLEVUE SEWER BACKFLOW STOP VALVE REBATE PROGRAM

To assist Bellevue citizens who suffer from sanitary sewer backups due to storm water surcharges in City sanitary sewer lines, the City of Bellevue offers a rebate towards the purchase and installation of a sewer backflow stop valve. A maximum rebate of \$500.00 is offered for the purchase and installation of a stop valve, when the total job cost equals or exceeds \$500.00. Full reimbursement is made for a purchase and installation costing less than \$500.00.

To receive the rebate, first contact Bellevue City Hall at 872-4456 to arrange for a preliminary inspection of your sanitary sewer line. After your stop valve has been installed, arrange a final inspection. Then complete this form and return it with a copy of your sewer backflow stop valve purchase/installation receipt. This receipt must show the date, place of purchase, and plumber's identification.
