

Residential Geothermal Heat Pump

PLEASE complete ALL sections and sign form to ensure proper and prompt payment of rebate.

Customer Address Information (person receiving rebate)

First Name	Last Name	Account Number	Phone
Address	City	State	Zip
Email Address			

Equipment Location Information Check if same address as above:

First Name	Last Name	Account Number	Phone
Address	City	State	Zip
Email Address			

Check the ACCOUNT TYPE where equipment is located:

<input type="radio"/> Residence Only	<input type="radio"/> Farm Only	<input type="radio"/> Apart.Bldg/Unit
<input type="radio"/> Resid./Farm	<input type="radio"/> Business Only	
<input type="radio"/> Resid./Business	<input type="radio"/> Commercial/Indust.	

Check if you are a builder/developer and building is not yet owned by live-in residents: "Spec Building"

Customer Agreement (Must Sign)

I verify that the above described equipment was installed on the date and location specified. I agree to all program requirements provided (either separately or on back of this form) and that my electric Utility reserves the right to inspect all equipment and verify information before issuing a rebate.

Terms and Conditions - Geothermal Heat Pump Equipment and Rate Incentives

Program Offer: The Program covers products purchased and/or services rendered on or after **January 1, 2017**.

Geothermal Heat Pump Equipment Requirements

1. Equipment must be listed in the AHRI Certification Directory for geothermal equipment. This information can be verified online for a given model number at www.ahridirectory.org. Data (including capacity) must be obtained from the appropriate section as follows:
 - WLHP Ratings required for Water Source equipment rebate.
 - GWHP Ratings required for Open Loop geothermal equipment rebate.
 - GLHP Ratings required for Closed Loop geothermal equipment rebate.
2. Size of unit used to determine rebate is based on the cooling capacity listed in the appropriate section of the AHRI Directory.
3. Closed or open loop heat exchangers must be designed to maintain water temperatures within AHRI performance test parameters for the type of equipment and rebate being considered.
4. Units rated only as water loop heat pump (WLHP) equipment must use water that is temperature controlled by a system such as a boiler/cooling tower.
5. Hydronic units may be used for domestic water heating or pool heating. These will NOT qualify for special heat rate programs unless units also provide space heating.
6. Rebates will be paid per 1/2-ton increment with the capacity determined using the appropriate AHRI rating.

NOTE: Installing contractors should provide Customers with the information necessary to complete the application for this program. Prior to installation, the contractor should be made aware of program requirements and you should contact the Utility to confirm that the system will qualify for an incentive.

Geothermal Heat Pump Incentives	
Geothermal Heat Pump with closed loop	\$350 / ton
Geothermal Heat Pump with open loop	\$250 / ton
Geothermal UNIT ONLY (existing closed/open loop)	\$250 <u>per unit</u>
Heat Plus Rate/Meter	\$100 / home or \$50 / apt. or shared bldg.

Heat Plus Rate Program Requirements

1. The primary heating system must be electric and metered separately.
2. The primary electric heating source must operate first, with any backup system operating only when the primary system is unable to satisfy the indoor thermostat setting.
3. An electric water heater (storage, heat pump or supplemental solar) must be installed and provide 100% of the domestic water heating for the home.
4. The space heated by the primary electric system must be an area of 400 square feet or more.
5. The rebate for the Heat Plus rate is only available to the building owner. The rate is applicable to all ratepayers (including renters) with eligible heating systems.

Qualifying Heat Plus Facilities

The following facilities can qualify for the Heat Plus rate:

- Single family residential dwellings and/or their outbuildings.
- Residential apartments and multi-family buildings (e.g. nursing homes and assisted living complexes). *May not apply to large complexes with individual meters.*
- Buildings or facilities (one or more buildings with the same owner at one location) served by one or more transformers with a combined rated capacity of 75 kVA or less.

Note: The Heat Plus rate is not to be applied to periodic heating applications or to heating during peak winter conditions only. A system where the building is totally unheated during unoccupied times is unacceptable.

The Utility reserves the right to suspend the rate and remove metering equipment owned by the Utility if the Customer is no longer using the equipment on a regular basis or is in violation of any program requirement.

General Terms and Conditions

The Utility must supply all electricity to the equipment for which the rebate is being paid.

Application Information: Missing or incorrect information on the application may delay processing and delivery of the rebate. An invoice is required and should include specific product information, including the brand, model, serial number and date of purchase of the energy efficient measures. Other information including manufacturer's equipment performance sheets may be required upon request.

The Utility reserves the right to verify sales transactions and to have reasonable access to the Customer's facility to inspect pre-existing equipment (if applicable) and energy efficient measures installed under this program.

Warranty Information: The Utility makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Utility does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

Limitation of Liability: The Utility's liability in connection with this program is limited to paying the rebate specified when all terms and conditions have been satisfied. Under no circumstances shall the Utility be liable for any consequential or incidental damages or tax liability resulting from participation in this program.

Participant Certification: Participating Customer certifies that he/she purchased and installed the equipment listed on their application at the defined location served by the Utility. The Customer agrees that all information provided is true and that he/she has conformed to all program requirements. If the equipment and application does not comply with the Utility's rules and qualifications, the rebate amount may be denied or adjusted.

Program Changes/Termination: The Utility reserves the right to extend, modify (including incentive levels) or terminate this Program at any time without prior or further notice. The Customer is responsible for checking with the Utility to determine whether the program has been changed or is still in effect.

Customers must apply for rebates within six (6) months of the purchase date (as shown on the Customer's invoice). Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
